

## **Sprint Report - CMPS 115**

### **What things should we stop doing?**

- Having excessively long meetings
- Stop allowing frustrations/the need to actively problem solve to get us hung up on single tasks

### **What should we start doing?**

- Keep meetings under 2-3 hours
- Explicitly assign tasks
- Consolidate notes quickly/efficiently into an action plan (i.e utilizing scrum board)
- Discuss having weekly meetings with the db team
- Make the scrum master's responsibility also to add to the wiki of what we have completed

### **What is working well that we should continue to do?**

- Forwarding emails that Ali sends to an individual in the group
- People getting things done individually
- Communicating and resolving problems together well. We make group decisions well and consider options and listen to all ideas from all teammates.

### **What work was completed, and not completed?**

- 14 out of 20 of our tasks were completed. The complete list of tasks completed is available on the wiki:  
[http://www.sead.systems/wiki/index.php/Front\\_End#Sprint\\_1\\_Status](http://www.sead.systems/wiki/index.php/Front_End#Sprint_1_Status)
- 3 out of 20 of the tasks were 'Halted', that is it was decided as a team that we didn't need to complete the task because it is unnecessary
- 3 out of 20 of the tasks were 'Moved to Sprint 2'. This is because certain tasks depended on cross team communication

### **What is our rate of completing work?**

- In terms of story points, we've completed 3.5 story points per day.
- In terms of ideal hours, we've completed 5.7 ideal hours per day.
